

# TEENAGE MUTANT NINJA TURTLES™

Kids,  
follow these  
simple blueprints,  
it's easy!

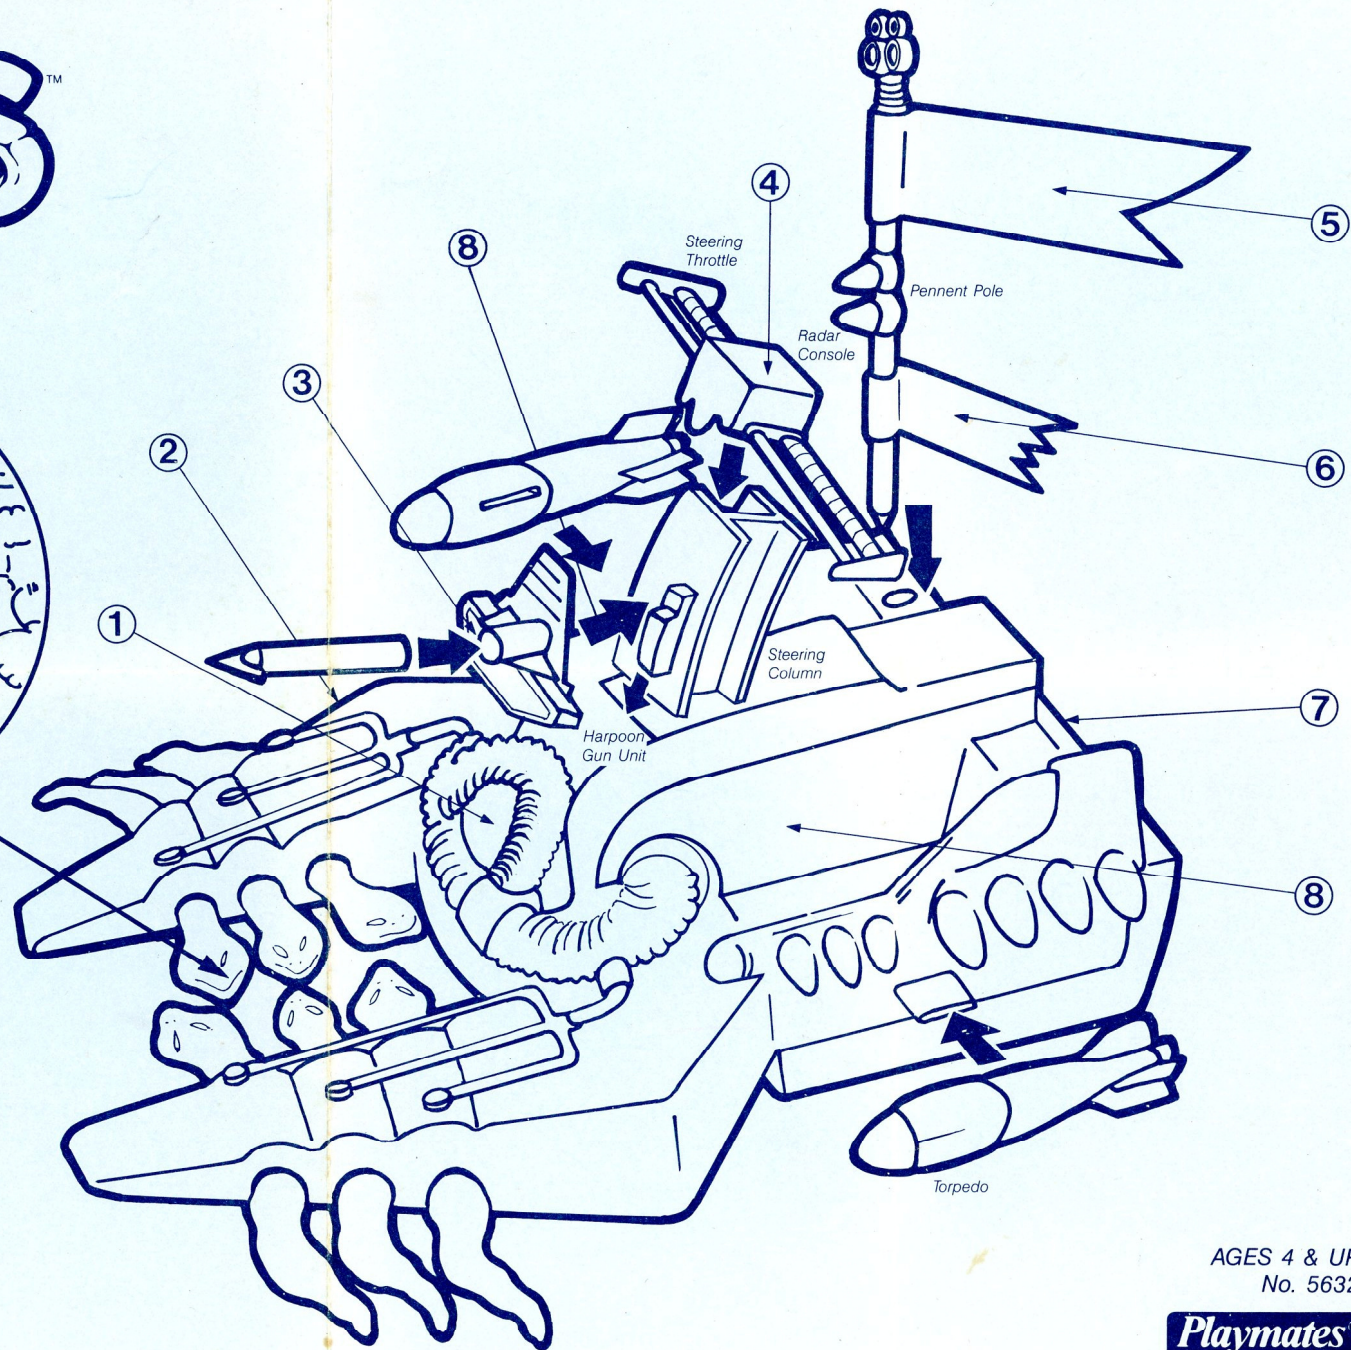

## ASSEMBLY

- Firmly snap steering column on top with flat side facing towards rear of Footski.
- Plug radar console on steering column with steering throttle facing towards rear of Footski.
- Snap harpoon gun unit to front of steering column.
- Plug pennant pole in back.
- Plug torpedoes in sides.
- Place labels on Footski (#1-8) as shown. Place extra labels where desired. Labels are water resistant.

## DIRECTION

- To ready Footski for water play: sit figure on gas tank and secure with hands on steering throttle.
- Capture enemy figures by squeezing neck of figure between vinyl leeches.
- Torpedoes easily detach from sides of Footski.

Note: Footski floats in water with most Turtle figures. For best performance, shake free of water periodically. Let dry between uses.
