Help! I'm a Super Sewer Stock Car trapped inside Don and I need you to get me out!

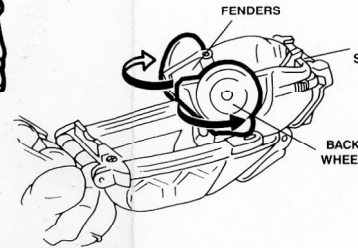

1. Fold down the lower front section of Don's body and swing the chest plate over his head to form the front of the stock car as shown.

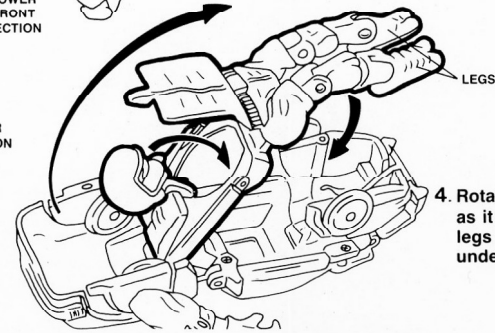

2. Lift up Don's back shell as indicated. Swing out the rear section of the stock car from under back shell.

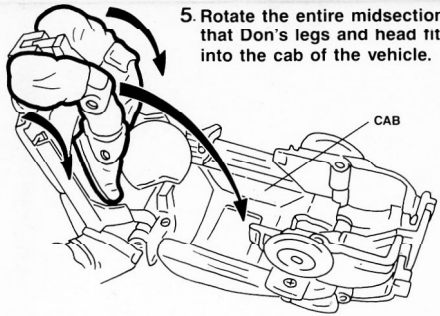

3. Then slide rear fenders to outer positions and rotate the back wheels out as shown.

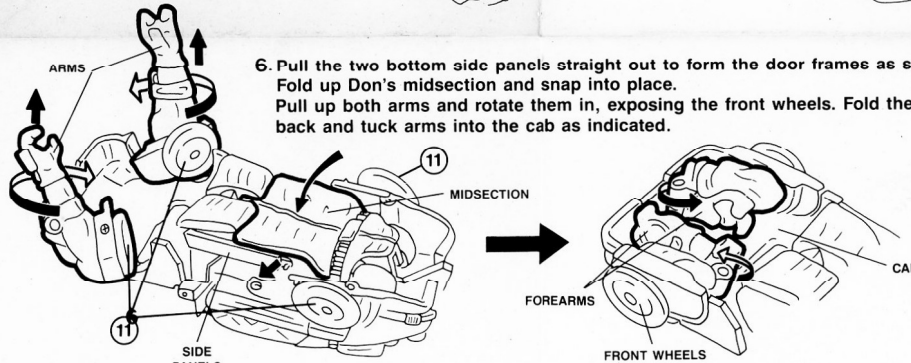

4. Rotate Don's head down as far as it will go. Next, fold both legs back and tuck Don's feet under his head as shown.

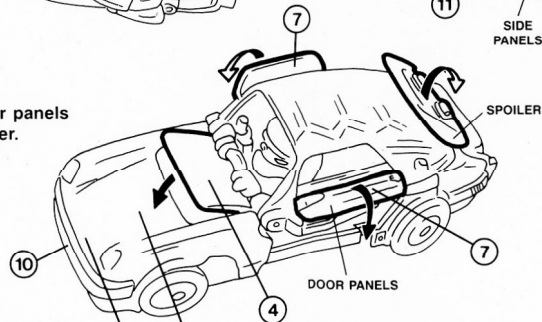

5. Rotate the entire midsection so that Don's legs and head fit into the cab of the vehicle.

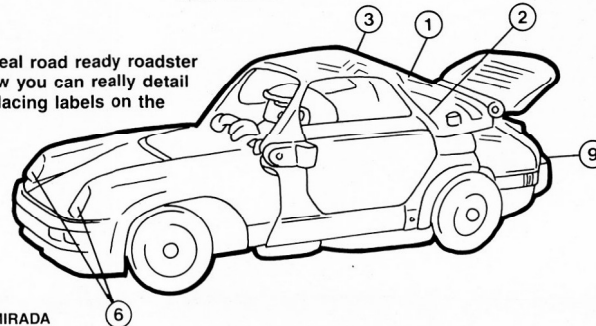

6. Pull the two bottom side panels straight out to form the door frames as shown. Fold up Don's midsection and snap into place. Pull up both arms and rotate them in, exposing the front wheels. Fold the forearms back and tuck arms into the cab as indicated.

7. Fold down the door panels and the back spoiler.

Now you've got a real road ready roadster — Don, that is! Now you can really detail the Stock Car by placing labels on the vehicle as shown. Whoa! Look out, dude!

Hold on to both ends of the shock absorber and pull it apart to form Don's bo. You're on your own to Mutate it back — good luck!

Pull the bottle cap straight up until it stops. Next flip open the bottom of the bottle as shown. Pull down the gun grip. To Mutate it back, just reverse the steps.

- NOTES:
- To Mutate the Super Sewer Stock Car back into stock car drivin' Don, just reverse the above instructions. It's that easy!
 - Do not force the Mutation process. If parts do not fit comfortably and figure/vehicle does not close easily, you may have missed a step.
 - Don't forget that being a Mutant master takes patience. The more you Mutate, the better you become!
 - Check out the enclosed Mutation Chart, which explains the miraculous evolution of these real Mutatin' Mutants!
