

TEENAGE MUTANT NINJA TURTLES MIGHTY MUTATIONS™

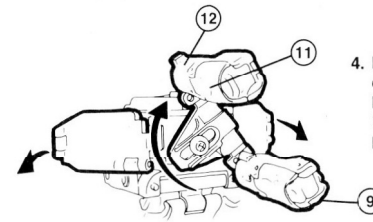

Help! I'm Donatello the Pizza pilot and I need your help to change into a High-Blastin Helicopter Gunship, just aching to battle all those nasty Foot dudes --.

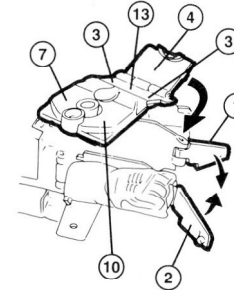

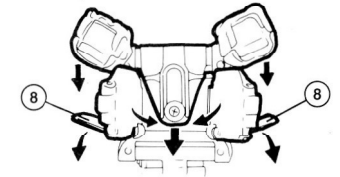

1. Rotate both Legs 180 degrees so both feet are facing backwards as shown.
2. Open the two Leg Compartments as shown, and fold his Feet up into the Compartment. Next, close the compartment as shown. Gently pull down on the two legs to release the Leg Assembly from the upper body.

3. While holding the Arms unlock the Side Panels to release the Donatello's Front Torso section from his Back Torso Section. Next, fold down the Front Torso Section as shown to expose the Helicopter Tail Rotor Section.

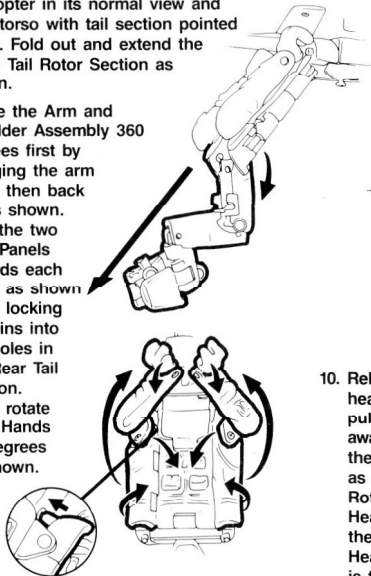

5. Fold down the two Horizontal Stabilizers as shown. Lower the leg Assembly down into the notch of the Fuselage and lock into position as shown. The Legs now form the Engines of the Helicopter.

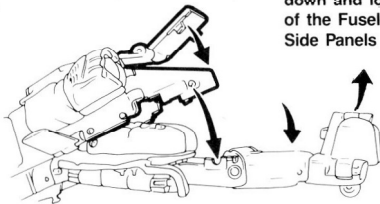

6. Fold back the two triangular Fuselage Panels as shown. Release and lift the Top Panel (located behind Donatello's neck) of his Back Pack Panel. Next, rotate the Back Pack Panel Back as shown to form the top of the Helicopter Fuselage.

7. Helicopter in its normal view and front torso with tail section pointed down. Fold out and extend the entire Tail Rotor Section as shown.

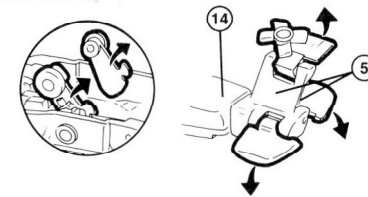

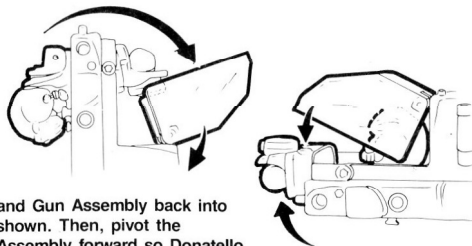

8. Rotate the Arm and Shoulder Assembly 360 degrees first by swinging the arm down then back up as shown. Fold the two Side Panels towards each other as shown while locking the pins into the holes in the Rear Tail Section. Next, rotate both Hands 90 degrees as shown.

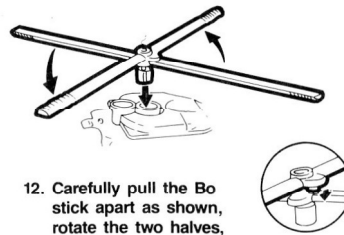

9. Fold the Tail Rotor Section, Front Torso and Arm Assembly up to form the bottom and tail section of the Helicopter. Next, lock the Side Panels of the Fuselage to the Tail Section as shown. Then, fold down and lock the Top of the Fuselage into the Side Panels as shown.

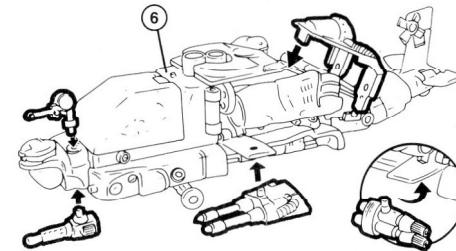

10. Release the head by pulling it away from the shoulders as shown. Rotate the Head/Shoulder and Gun Assembly back into the Canopy as shown. Then, pivot the Head/Shoulder Assembly forward so Donatello is facing straight ahead then close the Canopy.

11. Fold out the Rear Stabilizers and raise the Tail Rotor Assembly as shown. Fold down the Front Landing gear as shown, located on the bottom of the Gunship.

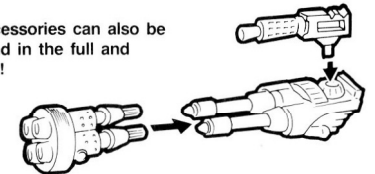

12. Carefully pull the Bo stick apart as shown, rotate the two halves, and lock into place to create the Main Rotor Blades. Then insert the Rotor Blades in the hole on the top of the Gunship as shown.

13. ACCESSORIES: Attach the Left Wing Mounted Gun to the Left Wing. Attach the Right Wing Mounted Gun to the Right Wing. Insert the Nose Mounted Target Scope and Spot Light in the hole in front of the Canopy. Insert the Nose Mounted Machine Gun under the Nose Assembly. Insert Tail Mounted Auxiliary Engine Pack in the slot behind the Main Rotor Blades.

Kowabunga! Thanks, Dude, now load me up with all those cool labels cuz' it's flyin' time!

Don't forget dudes, the accessories can also be used when I'm standing and in the full and up-right position. Awesome!

Mighty Mutation Tips

- To Mutate back into Donatello the Pizza Pilot, just reverse the above instructions. It's that easy!
- DO NOT force the Mutation process. If parts do not fit comfortably and figure/vehicle does not close easily, you may have missed a step.
- Don't forget that being a Mighty Mutant master takes patience. The more you mutate, the better you become.
