

**TEENAGE MUTANT NINJA
TURTLES**
**MINI
MUTANTS
BODACIOUS
BATTLESETS™**

Kids,
follow these
simple blueprints,
it's easy!

1. Mini-Mutant Shredder is ready for the mean, green fighting machine with some clever techno traps of his own. To prepare for Dimension X Wars™, mount the generator base for the Satellite Launcher onto the base as shown.

2. Place the satellite launcher on top of generator base as shown. To operate, simply rotate and aim at a tantalizing Turtle target. Carefully press down on the lever with your finger and release to launch the deadly sewer satellite as shown.

CAUTION: Do not aim the satellite at anyone's eyes or face.

3. To prepare Shredder's last ditch escape route. Place Transporter tube into hole on base. Raise tube and rotate clockwise to lock into position. Place Mini-Mutant Dimension X Shredder into tube, rotate the tube counterclockwise to the original position and lower tube to transport.

The Dimension X Wars will be over ... until Mini-Mutant Shredder returns with even more powerful weapons than before!

4. Mount Transporter Control Center and portal doors onto base as shown. Attach the ladder to the side of the control center as shown. Now you can send Shredder through the portal doors back to the Technodrome.

5. Mini-Mutant Dimension X Shredder really puts a sickly spin on things with his evil Supersonic Turtle Spinner. Place the rod into the hole on the control center as shown. Place Shredder into the spinner claws, rotate and release. What a way to go!

6. For total Turtle termination, place the Gravity Powered Turtle Crushin' Rock onto base as shown. If an unsuspecting Turtle happens to come to close, the slippery Shredder can instantly tip the rock onto the Turtle. Puts a whole new meaning to Owning a piece of the rock, doesn't it?

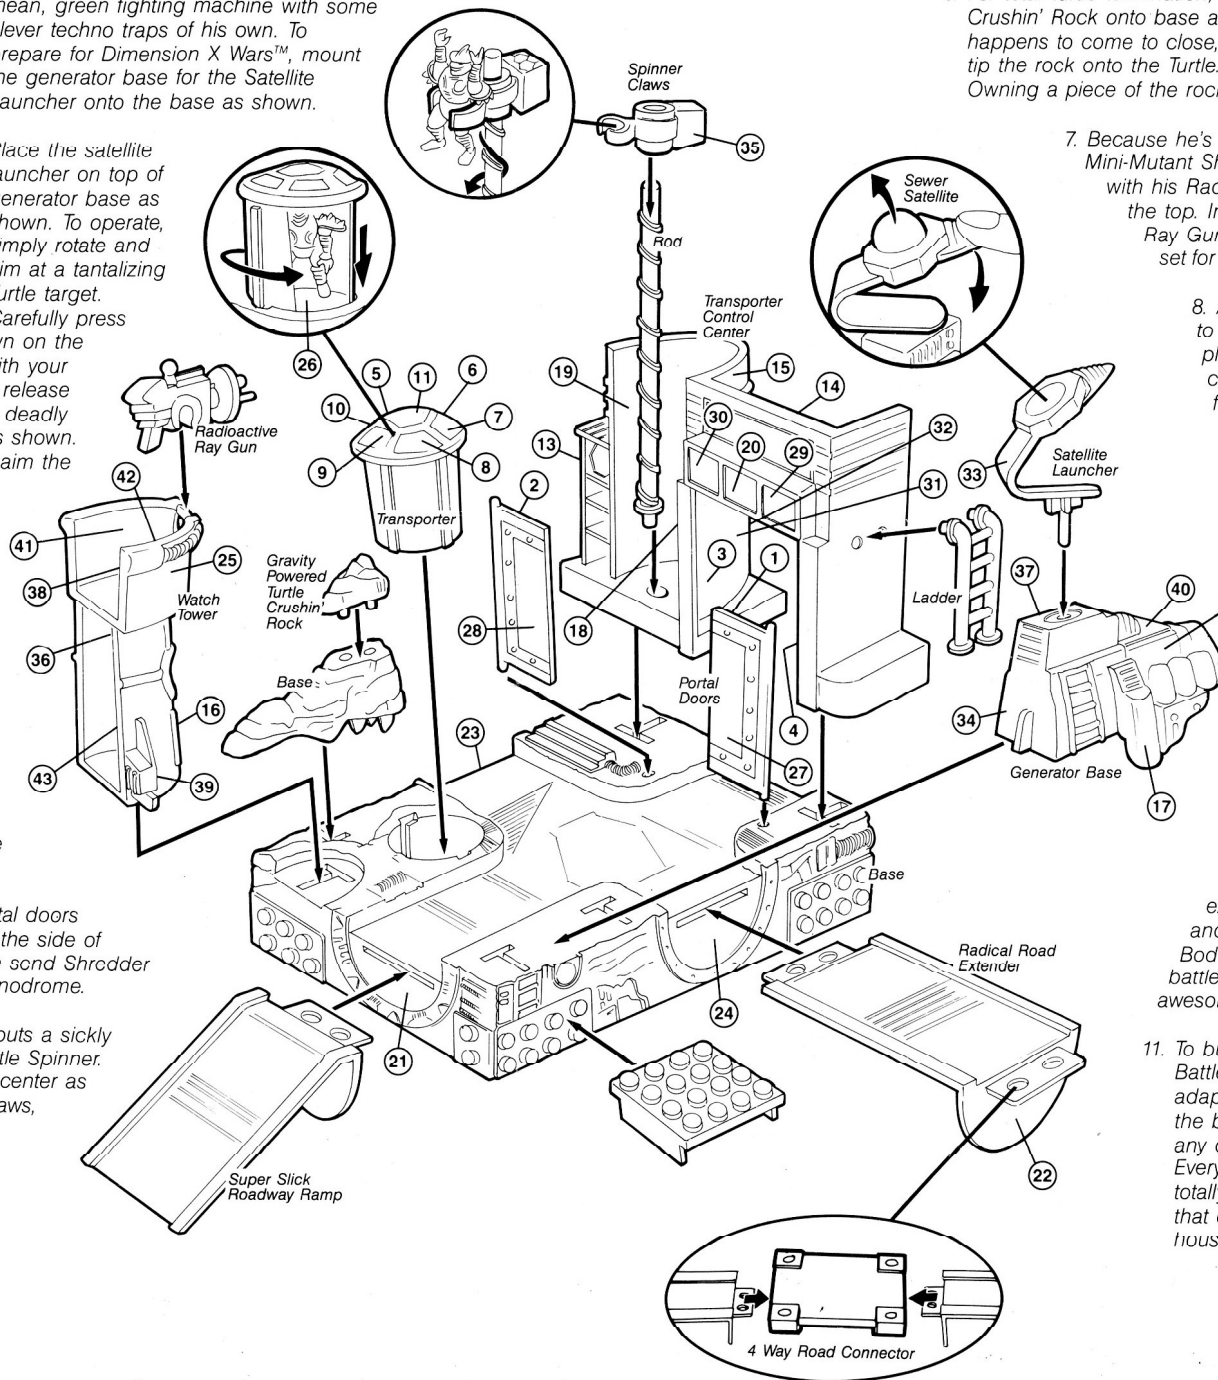

7. Because he's got to be in control at all times, Mini-Mutant Shredder has his own Watch Tower with his Radioactive Ray Gun mounted on the top. Insert Watch Tower onto base, snap Ray Gun on as shown and Shredder's all set for some fried Turtle fritters! Deelicious!

8. Attach the Radical Road Extender to any of the four ports on the playset base as shown. Roadways connect to other battleset ports to form a mega battle city! These ports can also be used with Hotwheels® and Matchbox® track to create a super city for the Mini-Mutant battles with the fearless Foot Clan. Roadways will connect to all battlesets. (Battlesets sold separately.)

9. Use the Super Slick Roadway Ramp to access any road you want with the Mini-Mutant Turtle Transports (sold separately.)

10. Kowabunga! The 4-way road connector attaches to the end of the Radical Road Extender so you can connect other battleset road extensions in different directions and create one big Mini-Mutant Bodacious City by joining all four battlesets together! What a totally awesome idea!

11. To build and extend your Bodacious Battleset into another realm, add the adaptor piece at the bottom corners of the battleset base to make it work with any of your own Lego® pieces! Everything works together for one totally incredible Bodacious Battleset that can take over your room, your house, even your neighborhood!
